## Notification

Dear Students,

The exam in General and Inorganic Chemistry for pharmacy students in the academic year 2020/2021 will be held in electronic format through the application **MS Forms** on January 08 at 10:00 a.m.

For successful performance on the exam please consider the following:

1. Students should login in the Office 365 platform via the MU - Plovdiv website in the application **MS Teams** at least 15 minutes earlier before the scheduled time for checking attendance and briefing. Students' cameras and microphones should be set on.

2. At the beginning of the exam students will receive a link to the test in the application **MS Forms**, on which will have the opportunity to work for 90 minutes. The test covers the material of the full lecture course and consists of 75 multiple choice questions (MCQ). Each correct answer gives 1 point, and the maximum score of the test is 75 points. The entire meeting will be recorded by examiners. In attempt of cheating or any other fraud the student's test will be invalidated.

3. The evaluation of the electronic test shall be based on the scores obtained according to the scale shown in the table:

Score, %	Grade
Below 60	Fail
60 - 70	Average
71 - 80	Good
81 - 90	Very good
91 - 100	Excellent

4. The students will be notified by the examiners when the scores are calculated and will be able to check their results by opening the shared link in MS Teams.

5. The final grade is formed according to the academic standard of the subject General and Inorganic Chemistry. It is formed according to a formula, which considers the results of the tests and colloquia conducted during the semester:

$$Q_{\text{Final grade}} = 0.2 \times Q_{\text{test 1 (lectures)}} + 0.2 \times Q_{\text{test 2 (lectures)}} + 0.1 \times Q_{\text{colloquia}} + 0.5 \times Q_{\text{exam}}$$

6. The final assessment of the exam shall be announced in MS Teams application within three days after the exam.

If you need additional information, send your enquires to the following email address:
