

INFORMATION FOR THE FINAL EXAM IN PEDIATRICS FOR 5TH YEAR MEDICAL STUDENTS

The exact dates of the exam, for every group, will be provided separately in the lectures channel.

The final exam in pediatrics for 5th year medical students will be conducted as listed below, and consists of:

1. Test on the material from all sections, consisting of multiple choice questions (MCQ)

Time - 60 minutes (about 1 minute per question)

Place – 8th auditorium, last floor of the Auditorium Complex

Technique - the students to sit the exam on every date are divided into groups of 40 per each round. The second and following groups are allowed in the room only after the first/previous group for the day has finished the test.

The test is solved on computers provided by MU, the program is MS Office / Forms. It consists of about 60 questions, based on the synopsis. The answers are scored according to the difficulty of the questions. To pass the tests, a result of correct answers of more than 50% of the total points is needed.

For the self preparation for the exam, students can get information from the presented sample test on the website of the Department.

2. Those who pass the test will continue with a practical exam

Beginning- one hour after the completion of the test.

Venue - Students gather in the large auditorium, on the fifth floor of the Department of Pediatrics, where they receive a random clinical case for the practical exam.

The exam is conducted at the patient's bedside and includes history, physical exam – clinical status, pathological signs and syndromes and probable diagnoses with differential diagnosis.

Those who pass the practical exam are given a final mark for the exam, which is based on the results of the test, the practical exam and the in-semester grades.

The rules were approved by the Department council, protocol N8/04.05.2022
