- sentences
- list of scientific publications on the topic of the dissertation
- copies of scientific publications
- list of participations in scientific forums
- list of noticed citations
- declaration of originality and authenticity of the attached documents
- other documents related to the course of the procedure

The doctoral student has submitted four publications in Bulgarian journals and forums.

2. Relevance of the topic

The chosen topic of the dissertation is relevant. It is clear that there is no universal cure for a wound. Only the differentiated approach and the targeted impact on the healing process at different times at different stages of wound healing, taking into account the individual characteristics of the process, allows to achieve the main goal - to heal the patient from the wound defect.

3. Acquaintance with the issue at hand

The dissertation shows that the doctoral student Dr. Dimitar Angelov Dachev has in-depth theoretical knowledge and professional skills in the scientific specialty "Pediatric Surgery", demonstrating qualities and skills for independent research.

4. Research methodology

The chosen research methodology by the doctoral student Dr. Dimitar Angelov Dachev allows to achieve the set goal and to obtain an adequate answer to the tasks solved in the dissertation.

5. Characteristics and evaluation of the dissertation and contributions

The overview, the goal and the tasks are well balanced. The dissertation work of Dr. Dimitar Angelov Dachev contains significant and accurate results from which logically derived contributions of original and confirmatory, and scientifically applied nature. The described contributions reliably present the qualities of the dissertation.

6. Evaluation of publications and personal contribution of the doctoral student

Dr. Dimitar Angelov Dachev has submitted a total of two scientific publications in connection with this procedure. Two of them are in the journal Surgery, and the other two have been published in collections of scientific forums. The personal participation of the doctoral student is evident from the text of the dissertation, the abstract and the presented publications.

7. Abstract

The sentence is prepared in accordance with the requirements and reflects the main results achieved in the dissertation.

CONCLUSION

The dissertation contains scientific, scientific-applied and applied results, which represent an original contribution to science and meet all the requirements of the Academic Staff Development Act in the Republic of Bulgaria (ZRASRB), Regulations of ZRASRB and the Regulations of MU - Plovdiv. The presented materials and dissertation results fully comply with the specific requirements adopted in connection with the Regulations of MU- Plovdiv for application of ZRASRB. The dissertation shows that the doctoral student Dr. Dimitar Angelov Dachev has in-depth theoretical knowledge and professional skills in the field of Pediatric Surgery, demonstrating qualities and skills for independent research.

Due to the above, I confidently give my positive assessment of the research presented by the above peer-reviewed dissertation, abstract, results and contributions, and I suggest to the esteemed scientific jury to award the educational and scientific degree "PhD degree" of e. Dimitar Angelov Dachev in the doctoral program in Pediatric Surgery in the field of higher education 7. "Health and Sports", professional field 7.1 "Medicine" and I also recommend the honorable members of the scientific jury to support this choice as well.
