State exam – syllabus – 2022

5. Epidemiology of periodontal diseases. Aim, objectives, definitions (rate, prevalence, severity of periodontal diseases).
6. Indices for assessment of oral hygiene and calculus, gingival inflammation, bleeding, and periodontal destruction.
17. Necrotizing gingivitis. Etiology, histopathology, clinical findings.
28. Treatment plan. Sequence of therapeutic phases and procedures.
29. Initial periodontal therapy – rationale, treatment sessions, sequence of procedures.
34. Systemic anti-infective therapy for periodontal diseases. Rationale, types of antibiotics, indications and contraindications, clinical use.
35. Locally delivered antimicrobials. Rationale, types of agents, mechanisms of action, clinical use.
36. Treatment of gingivitis.
37. Treatment of gingival enlargements.
38. Treatment of desquamative gingivitis.
40. Treatment of periodontitis.
50. Biologic mediators and growth factors used for periodontal regeneration.
55. Perimucositis and periimplantitis. Etiology, clinical and radiographic findings, treatment protocols.
56. Supportive periodontal treatment. Objectives and goals of maintenance phase. Examination and treatment procedures at recall visits.
57. Aphtous-ulcerative diseases of the oral mucosa.
58. Oral mucosa ulcers.
59. Vesiculo-ulcerative lesions with viral etiology affecting oral mucosa. Other oral lesions with viral origin.
60. Bullous-ulcerative diseases of the oral mucosa.
61. Oral lichen planus.
63. Symptomatic stomatitis due to systemic diseases.
64. HIV and AIDS.
65. Lips disorders.
66. Tongue disorders.
