GUIDELINES FOR THE ENTRY ON-LINE EXAM IN BIOLOGY

The entry exam in Biology is an on-line exam consisting of a written, anonymous multitask test. It covers all topics from the syllabus.

The exam test consists of 6 different tasks.

I. The first one includes 20 MCQs with one possible correct answer.

II. The second task requires to determine the correct statements out of 20 suggested.

III. Six definitions of basic biological terms and / or processes will be provided which should be matched with the corresponding terms listed below.

IV. The fourth task demands the labeling of a figure from the anatomy or molecular / cell biology topics of the syllabus.

V. In the fifth task includes a comparative approach to characterize two processes / molecules / structures, etc.

VI. The sixth task presents a text with 4 false words which should be discovered and corrected. Additional questions concerning the text are also included.

The candidates have to demonstrate a fluent knowledge of basic biological terms, ability to analyze and provide correct and precise answers. The entrance exam is similar but not identical to the example tests published online and to the ones in the reference textbooks.

Each task is evaluated by corresponding points and the total number of points is converted into a final mark ranging from 2.00 (poor) to 6.00 (excellent), the minimum passing grade being 3.00.
