The set of documents is presented according to the requirements, there is no missing information, the evidences are correct, thorough, up-to-date and systematized.

#### **III. Evaluation of the candidate's scientific works for the overall academic development.**

Assoc. Prof. Stanislav Georgiev entered in the competition with a total of 41 full-text scientific publications, several monographs or participation with chapters in collective monographic works, manuals and textbooks and detailed scientometric data and references. I would like to put a special emphasis on the study aids – textbooks, manuals, handbooks, practicums and others, presented in the candidate's set of documents. They are modern, up-to-date, some of them have been reprinted, in Bulgarian and English languages, and should be highly appreciated as candidate's quality and contribution in the development of the education of students, post-graduate and PhD students.

All monographs presented in the competition have been scientifically reviewed; they have a bibliographic registration and ISBN number, which confirms their importance for the scientific community.

The subject of Assoc. Prof. Georgiev's publications is diverse, with prevailing medical and social focus, as well as pharmaceutical regulation, and completely belongs within the scope of the scientific specialty of the announced competition.

I accept the presented scientific publications, the correctness of the journal impact factor reference and the calculations for the points according to the requirements of the regulations of Medical University-Plovdiv.

The candidate presents his scientific contributions in FIVE groups, all of them grouped by weight; they do not refer to all publications, and this shows maturity, critical self-assessment and a wide scope of the subject and scientific production.

Regarding the publications referenced in Scopus and/or Web of Science – a total of 23, published in the period 2014-2024, Assoc. Prof. Georgiev is NOT the first author in any of them, but on the other hand, he is the last in wide-profile author teams of a total of 5 (22%)

expert and consultant in the scope of the competition's scientific specialty, managing to skillfully combine teaching and scientific work.

Based on the above and my personal impressions of the joint professional collaboration, the public and professional activity of the candidate, personal qualities and respect among the professional guild, I support the opinion that Assoc.
