

EXAM INSTRUCTIONS
of the discipline
"MODELS IN PHARMACY"
for Pharmacy
in the Faculty of Pharmacy
of Medical University – Plovdiv

1. The exam is conducted in person.
2. The current grades provided in the curriculum of the specialty are given for:
 - The results of the student in the seminars, course and individual assignments, student work with the lecturer and assistant, etc. ;
3. The final grade of the semester exam is formed by the presentation of the developed coursework "Creating a Conceptual Model with Application in Pharmacy", as well as by the student's participation and work in classes and his/her independent work.
If the student has to take a remedial exam due to a poor grade, it is conducted according to the same scheme.
4. Standards for assessing student's achievement are carefully considered by the academic staff and are defined so as to objectify student assessments. The description of the standards for grades in "Models in Pharmacy" are the following:
 - Excellent (6) – for excellent knowledge of the topics of the course, in-depth mastery of basic and important additional knowledge and skills, meaningful and correct understanding of the subject, possession of skills to solve sufficiently complex problems for the specialty, demonstrating their own thinking and reasoning of decisions;
 - Very good (5) – almost meets the criteria for the higher grade, but has made small gaps in the accuracy and range of knowledge and skills;

- Good (4) – almost meets the criteria for the higher grades to a good extent, but has made some mistakes, has made gaps in completeness and accuracy;
- Medium (3) – has mastered the criteria for the higher grades, but to a satisfactory level, having shown basic knowledge and skills for the minimum positive grade;
- Weak (2) – does not meet the requirements for the higher grades.

At the beginning of the educational process in this discipline, students get acquainted with the standards for assessment, the procedures for conducting colloquia and the opportunities for receiving feedback on their progress during the semester.

5. The final grade determines the extent to which the given student has achieved the learning goal set at the beginning and is formed by the presentation of the developed coursework "Creating a Conceptual Model with Application in Pharmacy", as well as by the student's participation and work in classes and his/her independent work.

6. All electronic devices are handed over to the invigilators upon entering the examination hall and must be turned off beforehand. A student's examination is annulled if additional devices are found during the examination, if cheating equipment is discovered, or if a conversation is held between the participants.
